

## INSTALLATION POINTS

- Install tiles from multiple random packs at the same time. Packs should be selected at random from multiple pallets where possible.
- Follow the recommended grout gaps as seen on the label of this pack.
- Install tiles with underside fixing ribs all running in the same direction wherever possible.
- Flexible 1/2 inch expansion or movement joints should be installed along restrained perimeters of installed area, around rigid interruptions, and every 13 to 16 feet across an expanse of floor or paving. Or follow standards when available.

**Note:** For clarification of any point please contact us.

**No claim for product defects can be considered after installation.**
